## 36.102 Definitions.

As used in this part-

Contract is intended to refer to a contract for construction or a contract for architect-engineer services, unless another meaning is clearly intended.

Design means defining the *construction* requirement (including the functional relationships and technical systems to be used, such as architectural, environmental, structural, electrical, mechanical, and fire protection), producing the technical specifications and drawings, and preparing the *construction* cost estimate.

Design-bid-build means the traditional delivery method where design and construction are sequential and contracted for separately with two contracts and two contractors.

Design-build means combining design and construction in a single contract with one contractor.

Firm in conjunction with *architect-engineer services*, means any individual, partnership, corporation, association, or other legal entity permitted by law to practice the professions of architecture or engineering.

*Plans and specifications* means drawings, specifications, and other data for and preliminary to the *construction*.

*Record drawings* means drawings submitted by a contractor or subcontractor at any tier to show the *construction* of a particular structure or work as actually completed under the *contract*.

Two-phase design-build selection procedures is a selection method in which a limited number of offerors (normally five or fewer) is selected during Phase One to submit detailed proposals for Phase Two (see <a href="subpart 36.3">subpart 36.3</a>).
