

46.202-3 Standard inspection requirements.

(a) Standard *inspection* requirements are contained in the clauses prescribed in 46.302 through 46.308, and in the product and service specifications that are included in *solicitations* and contracts.

(b) The clauses referred to in (a) of this section-

(1) Require the contractor to provide and maintain an *inspection* system that is acceptable to the Government;

(2) Give the Government the right to make *inspections* and tests while work is in process; and

(3) Require the contractor to keep complete, and make available to the Government, records of its *inspection* work.
