49.109-6 Joint settlement of two or more settlement proposals.

- (a) With the consent of the contractor, the TCO or TCO's concerned *may* negotiate jointly two or more termination *settlement proposals* of the same contractor under different contracts, even though the contracts are with different *contracting offices* or agencies. In such cases, accounting work *shall* be consolidated to the greatest extent practical. The resulting settlement *may* be evidenced by one *settlement agreement* covering all contracts involved or by a separate agreement for each contract involved.
- (b) When the settlement agreement covers more than one contract, it shall-
- (1) Clearly identify the contracts involved,
- (2) Assign an amendment modification number to each contract,
- (3) Apportion the total amount of the settlement among the several contracts on some reasonable basis,
- (4) Have attached or incorporated a schedule showing the apportionment, and
- (5) Be distributed and attached to each contract involved in the same manner as other *contract modifications*.
