## 17.802 Policy.

- (a) The use of reverse auctions may be appropriate when market research indicates that—
- (1) A competitive marketplace exists for the supplies and/or services being acquired;
- (2) Multiple offerors can satisfy the agency's requirement; and
- (3) The nature of the *supplies* and/or services being acquired (*e.g.*, clearly defined specifications, less complex requirements) encourages an iterative bidding process (*i.e.*, multiple *offerors* participate and at least one *offeror* submits more than one *offer* during the *reverse auction*).
- (b) The reverse auction process is used to obtain pricing for an acquisition. When using the reverse auction process, contracting officers are still required to follow the acquisition policies and procedures (e.g., those prescribed in subpart 8.4 or 16.5, or part 13 or 15), as appropriate for the particular acquisition.

(c)

- (1) A service platform for conducting *reverse auctions may* be provided by a commercial or Government entity.
- (2) While some reverse auction service providers are paid directly by the Government for reverse auction services, other providers may incorporate a fee structure that uses an indirect payment method. When using an indirect payment method, the reverse auction service provider adds a fee(s) to the price of the successful offer that is provided to the Government at the close of an auction. The Government then pays the successful offeror the total price of the offer, which includes the fee(s) added by the reverse auction service provider. The reverse auction service provider then collects its fee(s) from the successful offeror.
- (3) When acquiring reverse auction services from a commercial reverse auction service provider, agencies shall—
- (i) Use competitive procedures, unless an exception applies;
- (ii) Detail the provider's fee structure in the resultant contract or agreement for *reverse auction* services; and
- (iii) Make the details of the contract or agreement for *reverse auction* services, including the provider's fee structure, available to *contracting officers* for consideration when determining whether to use a *reverse auction service provider*, in accordance with <u>17.804(a)</u>.
- (4) When acquiring *reverse auction* services, the *contracting officer shall* ensure the following information is provided in the *solicitation* and contract:
- (i) Descriptions of Government data and Government-related data.
- (ii) Data ownership, licensing, delivery, and disposition instructions specific to the relevant types of Government data and Government-related data ( *e.g.*, DD Form 1423, Contract Data Requirements List; work statement task; *line item*). Disposition instructions *shall* provide for the transition of data

in commercially available, or open and non-proprietary format and for permanent records, in accordance with disposition guidance issued by the National Archives and Records Administration.

- (d) Contracting officers shall only use the services of a reverse auction service provider that—
- (1) Does not assert or imply that it can or will obtain a Government contract for participants of a *reverse auction*;
- (2) Allows entities to register, at no cost, as potential *offerors* for *reverse auctions* conducted on behalf of the Government on the provider's *reverse auction* platform;
- (3) Allows each entity, as part of the registration process, the opportunity to execute a proprietary data protection agreement with the provider; provided that the terms in the agreement do not affect the terms and conditions of a Government *solicitation* or contract;
- (4) Protects from unauthorized use or disclosure and does not release outside of the Government—
- (i) All contractor bid or proposal information (see <u>3.104-1</u>) and *source selection information* associated with providing *reverse auction* services to the Government;
- (ii) All information similarly generated to support the issuance of a *task order* or *delivery order* or order under a blanket purchase agreement; and
- (iii) Information identified by an *offeror* as restricted from duplication, use, or disclosure—in whole or in part—for any purpose other than to evaluate the *reverse auction* participant's price or proposal;
- (5) Allows *offerors* to see the successive lowest price(s) offered in the auction without revealing an *offeror*'s identity;
- (6) At the close of each auction—
- (i) Provides the Government with the successful *offer*, along with information that separately identifies the *offeror*'s price and the price for each provider fee or charge included in the total price; and
- (ii) Provides the Government with all information and documentation received from *offerors* in response to the *reverse auction*.
- (7) Does not participate as an *offeror* in any *reverse auction* which the provider is hosting on behalf of the Government. This prohibition includes participation in a *reverse auction* by any entity with which the provider has a relationship that raises an actual or potential conflict of interest; and
- (8) Asserts no rights or license in the data gathered or generated during a reverse auction.
- (e) Only a contracting officer shall—
- (1) Exclude an *offeror* from participating in an auction;
- (2) Determine the awardee(s) of any reverse auction; or
- (3) Determine that the *offeror* is a *responsible prospective contractor* (see 9.103, 9.104-1, and 9.405(d)).
